

# What do I do if the Roy Price Archive files won't download from the Google Drive?

If you are using Google Chrome as a browser, it's possible the 'Privacy and Security' settings need to be changed:

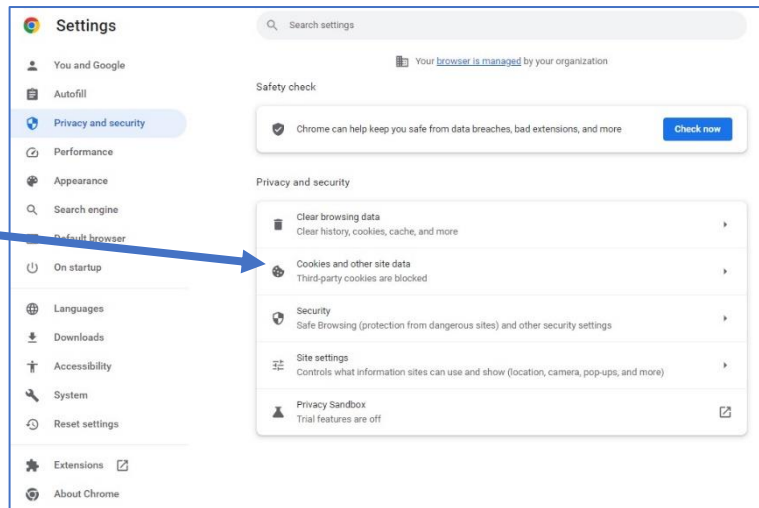

Click on the three dots at the top-right of your Google browser

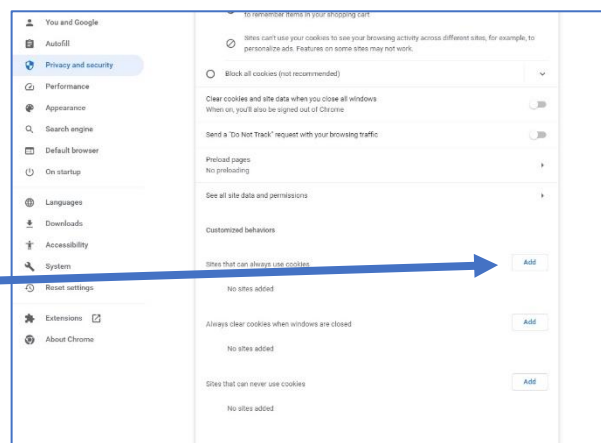

Click on 'Settings', then click on 'Privacy and Security' on the list of options on the left of the screen

Click on 'Cookies and other site data'

Scroll down the page until you come to 'Sites that can always use cookies', then click on 'Add'

You have two things to do: key in

'drive.google.com'

where it says 'Site', then tick the box which says 'Including third-party cookies on this site'.

Then click on 'Add'.

Now go back to the file you wanted to download and try again.

If you still have problems, contact the web designer: john.n.cuthbert@gmail.com
